# Package 'ruODK'

July 24, 2020

```
Type Package
Title An R Client for the ODK Central API
Version 0.9.0
Description Utilities to access and tidy up data from ODK
      Central's API. ODK Central is OpenDataKit's clearinghouse for
      digitally captured data <a href="https://docs.opendatakit.org/central-intro/">https://docs.opendatakit.org/central-intro/>.
      ODK Central's API is documented at
      <a href="https://odkcentral.docs.apiary.io/">https://odkcentral.docs.apiary.io/>.

4 attachment\_get

 $\verb|attachment_get|$ 

Download attachments and return the local path.

# Description

#### Stable

# Usage

```
attachment_get(
    sid,
    fn,
    local_dir = "media",
    separate = FALSE,
    pid = get_default_pid(),
    fid = get_default_fid(),
    url = get_default_url(),
    un = get_default_ur(),
    pw = get_default_pw(),
    verbose = get_ru_verbose()
)
```

# **Arguments**

| sid       | One or many ODK submission UUIDs, an MD5 hash.  |
|-----------|---|
| fn        | One or many ODK form attachment filenames, e.g. "1558330537199.jpg".  |
| local_dir | The local folder to save the downloaded files to, default: "media".   |
| separate  | (logical) Whether to separate locally downloaded files into a subfolder named after the submission unid within 'local_dir', default: FALSE. The defaults mirror the behaviour of submission_export, which keeps all attachment files together in a folder 'media'. Enable this option if downloaded files collide on idential names. This can happen if two data collection devices by chance generate the same filename for two respective media files, e.g. 'DCIM0001.jpg'. |
| pid       | The numeric ID of the project, e.g.: 2. Default: <pre>get_default_pid</pre> . Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").  |
| fid       | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK").  |
| url       | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK").   |
| un        | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").  |

attachment\_get 5

| pw      | The ODK Central password. Default: get_default_pw. Set default pw through       |  |
|---------|---|--|
|         | <pre>ru_setup(pw=""). See vignette("Setup",package = "ruODK").</pre>            |  |
| verbose | Whether to display debug messages or not. Read 'vignette("setup", package =     |  |
|         | "ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function. |  |

#### **Details**

This function is the workhorse for handle\_ru\_attachments. This function is vectorised and can handle either one or many records. Parameters submission\_uuid and attachment\_filename accept single or exactly the same number of multiple values. The other parameters are automatically repeated.

The media attachments are downloaded into a folder given by 'local\_dir':

```
workdir/media/filename1.jpg
workdir/media/filename2.jpg
workdir/media/filename3.jpg
```

#### Value

The relative file path for the downloaded attachment(s)

#### See Also

```
https://odkcentral.docs.apiary.io/#reference/forms-and-submissions/'-form-attachments/
downloading-a-form-attachment

downloading-an-attachment

Other utilities: attachment_url(), form_schema_parse(), get_one_attachment(), get_one_submission_attachment
get_one_submission(), handle_ru_attachments(), handle_ru_datetimes(), handle_ru_geopoints(),
handle_ru_geoshapes(), handle_ru_geotraces(), isodt_to_local(), odata_submission_rectangle(),
predict_ruodk_name(), prepend_uuid(), ru_msg_abort(), ru_msg_info(), ru_msg_noop(),
ru_msg_success(), ru_msg_warn(), split_geopoint(), split_geoshape(), split_geotrace(),
strip_uuid(), tidyeval, unnest_all()
```

# **Examples**

```
## Not run:
# Step 1: Setup ruODK with OData Service URL (has url, pid, fid)
ruODK::ru_setup(svc = "...")
a_local_dir <- here::here()

# Step 2: Get unparsed submissions
fresh_raw <- odata_submission_get(parse = FALSE)

# Step 3: Get attachment field "my_photo"
fresh_parsed <- fresh_raw %>%
    odata_submission_rectangle() %>%
    dplyr::mutate(
        my_photo = attachment_get(id,
```

6 attachment\_link

```
my_photo,
    local_dir = a_local_dir,
    verbose = TRUE
)
    # Repeat for all other attachment fields
)
## End(Not run)
```

 $attachment\_link$ 

Prefix attachment columns from CSV export with a local attachment file path.

#### **Description**

### Stable

### Usage

```
attachment_link(data_tbl, form_schema, att_path = "media")
```

# Arguments

data\_tbl The downloaded submissions from submission\_export read into a 'tibble' by

readr::read\_csv.

form\_schema The 'form\_schema' for the submissions. E.g. the output of 'ruODK::form\_schema()'.

att\_path A local path, default: "media" (as per .csv.zip export). Selected columns of the

dataframe (containing attchment filenames) are prefixed with 'att\_path', thus

turning them into relative paths.

# Value

The dataframe with attachment columns modified to contain relative paths to the downloaded attachment files.

```

# **Examples**

```
## Not run:
t <- tempdir()
# Set default credentials, see vignette "setup"
ruODK::ru_setup(
   svc = paste0(</pre>
```

attachment\_list 7

```
"https://sandbox.central.getodk.org/v1/projects/14/",
    "forms/build_Flora-Quadrat-0-2_1558575936.svc"
  ),
  un = "me@email.com",
  pw = "..."
)
# Predict filenames (with knowledge of form)
fid <- get_default_fid()</pre>
fid_csv <- fs::path(t, glue::glue("{fid}.csv"))</pre>
fid_csv_tae <- fs::path(t, glue::glue("{fid}-taxon_encounter.csv"))</pre>
fs <- form_schema()</pre>
# Download the zip file
se <- ruODK::submission_export(</pre>
  local_dir = t,
  overwrite = FALSE,
  verbose = TRUE
)
# Unpack the zip file
f <- unzip(se, exdir = t)</pre>
fs::dir_ls(t)
# Prepend attachments with media/ to turn into relative file paths
data_quadrat <- fid_csv %>%
  readr::read_csv(na = c("", "NA", "na")) %>%
  janitor::clean_names() %>%
  handle_ru_datetimes(fs) %>%
  attachment_link(fs)
## End(Not run)
```

attachment\_list

List all attachments for a list of submission instances.

#### **Description**

List all attachments for a list of submission instances.

# Usage

```
attachment_list(
   iid,
   pid = get_default_pid(),
   fid = get_default_fid(),
   url = get_default_url(),
   un = get_default_urn(),
   pw = get_default_pw()
)
```

8 attachment\_list

#### **Arguments**

| iid | A list of submission instance IDs, e.g. from submission_list\$instance_id.   |
|-----|--|
| pid | The numeric ID of the project, e.g.: 2. Default: <pre>get_default_pid</pre> . Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").                 |
| fid | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK"). |
| url | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK").                    |
| un  | The ODK Central username (an email address). Default: <pre>get_default_un</pre> . Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").               |
| pw  | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").                                  |

#### Value

A tibble containing some high-level details of the submission attachments. One row per submission attachment, columns are submission attributes:

\* name: The attachment filename, e.g. 12345.jpg \* exists: Whether the attachment for that submission exists on the server.

```

# **Examples**

```
## Not run:
# Step 1: Setup ruODK with OData Service URL (has url, pid, fid)
ruODK::ru_setup(svc = "...")

# Step 2: List all submissions of form
sl <- submission_list()

# Step 3a: Get attachment list for first submission
al <- get_one_submission_attachment_list(sl$instance_id[[1]])
# Ste 3b: Get all attachments for all submissions</pre>
```

audit\_get 9

```
all <- attachment_list(sl$instance_id)
## End(Not run)</pre>
```

 $audit\_get$ 

Get server audit log entries.

# Description

# Stable

# Usage

```
audit_get(
  action = NULL,
  start = NULL,
  end = NULL,
  limit = NULL,
  offset = NULL,
  url = Sys.getenv("ODKC_URL"),
  un = Sys.getenv("ODKC_UN"),
  pw = Sys.getenv("ODKC_PW")
)
```

# **Arguments**

| action | string. The action to filter the logs, e.g. "user.create". See https://odkcentral.docs.apiary.io/#reference/system-endpoints/server-audit-logs/ for the full list of available actions. |
|--------|---|
| start  | string. The ISO8601 timestamp of the earliest log entry to return. E.g. '2000-01-01z' or '2000-12-31T23:59.999z', '2000-01-01T12:12:12+08' or '2000-01-01+08'.                          |
| end    | string. The ISO8601 timestamp of the last log entry to return.  |
| limit  | integer. The max number of log entries to return.   |
| offset | integer. The number of log entries to skip.   |
| url    | The ODK Central base URL without trailing slash. Default: <pre>get_default_url</pre> . Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK").               |
| un     | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").                                  |
| pw     | The ODK Central password. Default: get_default_pw. Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").   |

10 audit\_get

#### **Details**

Parameters to filter the audit logs: 'action=form.create&start=2000-01-01z&end=2000-12-31T23

#### Value

A tibble containing server audit logs. One row per audited action, columns are submission attributes:

\* actor\_id: integer. The ID of the actor, if any, that initiated the action. \* action: string. The action that was taken. \* actee\_id: uuid, string. The ID of the permissioning object against which the action was taken. \* details: list. Additional details about the action that vary according to the type of action. \* logged\_at: dttm. Time of action on server.

## End(Not run)
```

form\_list

List all forms.

# **Description**

Stable

form\_list 13

#### Usage

```
form_list(
  pid = get_default_pid(),
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw()
)
```

### **Arguments**

| pid | The numeric ID of the project, e.g.: 2. Default: <pre>get_default_pid</pre> . Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").   |
|-----|--|
| url | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK").      |
| un  | The ODK Central username (an email address). Default: <pre>get_default_un</pre> . Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK"). |
| рw  | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").                    |

### Value

A tibble with one row per form and all form metadata as columns.

### See Also

```
https://odkcentral.docs.apiary.io/#reference/forms-and-submissions/forms
Other restful-api: attachment_link(), attachment_list(), audit_get(), form_detail(), form_schema(), form_xml(), project_create(), project_detail(), project_list(), submission_detail(), submission_export(), submission_get(), submission_list()
```

# **Examples**

```
## Not run:
# Set default credentials, see vignette "setup"
ruODK::ru_setup(
    svc = paste0(
        "https://sandbox.central.getodk.org/v1/projects/14/",
        "forms/build_Flora-Quadrat-0-2_1558575936.svc"
    ),
        un = "me@email.com",
        pw = "..."
)
# With default pid
fl <- form_list()</pre>
```

14 form\_schema

```
# With explicit pid
fl <- form_list(pid = 1)

class(fl)
# > c("tbl_df", "tbl", "data.frame")
## End(Not run)
```

form\_schema

Show the schema of one form.

# **Description**

#### Stable

### Usage

```
form_schema(
   flatten = FALSE,
   odata = FALSE,
   parse = TRUE,
   pid = get_default_pid(),
   fid = get_default_fid(),
   url = get_default_url(),
   un = get_default_url(),
   pw = get_default_pw(),
   odkc_version = get_default_odkc_version(),
   verbose = get_ru_verbose()
)
```

# **Arguments**

flatten Whether to flatten the resulting list of lists (TRUE) or not (FALSE, default).

Only applies to ODK Central version < 0.8.

odata Whether to sanitise the field names to match the way they will be outputted for

OData. While the original field names as given in the XForms definition may be used as-is for CSV output, OData has some restrictions related to the domain-qualified identifier syntax it uses. Only applies to ODK Central version < 0.8.

Default: FALSE.

parse Whether to parse the form schema into a tibble of form field type and name.

This uses form\_schema\_parse internally. If used together with 'flatten=TRUE', form\_schema will raise a warning and return the unparsed, flattened form schema.

Only applies to ODK Central version < 0.8. Default: TRUE.

pid The numeric ID of the project, e.g.: 2. Default: get\_default\_pid. Set de-

fault pid through ru\_setup(pid="..."). See vignette("Setup",package =  $\,$ 

"ruODK").

form\_schema 15

| fid          | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK").  |
|--------------|---|
| url          | The ODK Central base URL without trailing slash. Default: <pre>get_default_url</pre> Set default url through ru_setup(url=""). See vignette("Setup", package = "ruODK").  |
| un           | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").  |
| pw           | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup", package = "ruODK").  |
| odkc_version | The ODK Central version as decimal number (major.minor). 'ruODK' uses this parameter to adjust for breaking changes in ODK Central. Default: get_default_odkc_version or 0.8 if unset. Set default get_default_odkc_version through ru_setup(odkc_version=0.8). See vignette("Setup", package = "ruODK"). |
| verbose      | Whether to display debug messages or not. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.   |

#### **Details**

ODK Central has introduced a new API endpoint in version 0.8 which returns a parsed and flattened list of fields. This replaces the nested form schema which is challenging to parse.

While users of newest ODK Central versions (>0.8) can ignore the legacy support for ODK Central's earlier form schema API, users of ODK Central version < 0.8 can set an environment variable ODKC\_VERSION to their ODKC's version in format <major>.<minor> e.g. 0.7. This variable caters for future breaking changes.

Either way, form\_schema will always return a tibble with columns name, type, path and ruodk\_name.

# Value

A tibble or nested list (v0.7) containing the form definition. At the lowest nesting level, each form field consists of a list of two nodes, 'name' (the underlying field name) and 'type' (the XForms field type, as in "string", "select1", "geopoint", "binary" and so on). These fields are nested in lists of tuples 'name' (the XForms screen name), 'children' (the fields as described above), 'type' ("structure" for non- repeating screens, "repeat" for repeating screens). A list with 'name' "meta" may precede the structure, if several metadata fields are captured (e.g. "instanceId", form start datetimes etc.). In all cases for ODK Central 0.8, and with default parameters (parse=TRUE) for ODK Central 0.7, form\_schema returns a tibble with the columns:

- name The field name as given in the form schema.
- type The field type, e.g. "string", "select1", etc.
- path The XForms path of the field,
- ruodk\_name The predicted field name as generated by odata\_submission\_get, prefixed by the path.

# Point location: used by handle_ru_geopoints
fs %>% dplyr::filter(type == "geopoint")
## End(Not run)
```

18 form\_schema\_parse

form\_schema\_parse

Parse a form\_schema into a tibble of fields with name, type, and path.

#### **Description**

**Stable** 

### Usage

```
form_schema_parse(fs, path = "Submissions", verbose = get_ru_verbose())
```

#### **Arguments**

| fs | The customet of forms | schema as nested list |
|----|-----------------------|-----------------------|
| TS | The output of form    | schema as nested list |
|    |                       |                       |

path The base path for form fields. Default: "Submissions". form\_schema\_parse re-

cursively steps into deeper nesting levels, which are reflected as separate OData tables. The returned value in 'path' reflects the XForms group name, which translates to separate screens in ODK Collect. Non-repeating form groups will be flattened out into the main Submissions table. Repeating groups are available

as separate OData tables.

verbose Whether to display debug messages or not. Read 'vignette("setup", package =

"ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.

#### **Details**

This function is used by form\_schema for older versions of ODK Central (pre 0.8). These return the form schema as XML, requiring the quite involved code of form\_schema\_parse, while newer ODK Central versions return JSON, which is parsed directly in form\_schema.

The 'form\_schema' returned from ODK Central versions < 0.8 is a nested list of lists containing the form definition. The form definition consists of fields (with a type and name), and form groups, which are rendered as separate ODK Collect screens. Form groups in turn can also contain form fields.

form\_schema\_parse recursively unpacks the form and extracts the name and type of each field. This information then informs handle\_ru\_attachments, handle\_ru\_datetimes, handle\_ru\_geopoints, handle\_ru\_geotraces, and handle\_ru\_geoshapes.

```
Other utilities: attachment_get(), attachment_url(), get_one_attachment(), get_one_submission_attachment_liget_one_submission(), handle_ru_attachments(), handle_ru_datetimes(), handle_ru_geopoints(), handle_ru_geoshapes(), handle_ru_geotraces(), isodt_to_local(), odata_submission_rectangle(), predict_ruodk_name(), prepend_uuid(), ru_msg_abort(), ru_msg_info(), ru_msg_noop(), ru_msg_success(), ru_msg_warn(), split_geopoint(), split_geoshape(), split_geotrace(), strip_uuid(), tidyeval, unnest_all()
```

form\_xml

# **Examples**

```
## Not run:
# Option 1: in two steps, ODKC Version 0.7
fs <- form_schema(flatten = FALSE, parse = FALSE, odkc_version = 0.7)
fsp <- form_schema_parse(fs)
# Option 2: in one go
fsp <- form_schema(parse = TRUE)
fsp
## End(Not run)</pre>
```

form\_xml

Show the XML representation of one form as list.

# Description

# Stable

# Usage

```
form_xml(
  parse = TRUE,
  pid = get_default_pid(),
  fid = get_default_fid(),
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw()
)
```

# **Arguments**

| parse | Whether to parse the XML into a nested list, default: TRUE   |
|-------|--|
| pid   | The numeric ID of the project, e.g.: 2. Default: get_default_pid. Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").                             |
| fid   | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK"). |
| url   | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup", package = "ruODK").                   |
| un    | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").                           |
| pw    | The ODK Central password. Default: get_default_pw. Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").  |

fq\_attachments

A tibble of submission attachments.

# **Description**

Stable

# Usage

fq\_attachments

fq\_data 21

#### **Format**

A tibble of submission attachments.

#### **Source**

The output of attachment\_list run on submissions of the test form 'system.file("extdata", "FloraQuadrat04.xml", package = "ruODK")'.

#### See Also

Other included: fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw, geo\_wkt

fq\_data

Parsed submission data for an ODK Central form.

#### **Description**

Stable

### Usage

fq\_data

#### **Format**

The output of odata\_submission\_get for a set of example data. A tidy tibble referencing the attachments included in the vignettes and documentation at a relative path 'attachments/media/<filename>.<ext>'.

#### **Details**

The parsed OData response for the submissions of an ODK Central form. This form represents a Flora Quadrat, which is a ca 50 by 50 m quadrat of a uniform plant community.

The XML and .odkbuild versions for this form are available as 'system.file("extdata", "FloraQuadrat04.xml", package = "ruODK")' and 'system.file("extdata", "FloraQuadrat04.odkbuild", package = "ruODK")', respectively.

This data is kept up to date with the data used in vignettes and package tests. The data is comprised of test records with nonsensical data. The forms used to capture this data are development versions of real-world forms.

### Source

See 'system.file("extdata", "FloraQuadrat04.xml", package = "ruODK") and odata\_submission\_get.

22 fq\_data\_strata

#### **Description**

Stable

# Usage

fq\_raw\_taxa

#### **Format**

A list of lists

#### **Details**

The OData response for a subgroup of an ODK Central form.

This subgroup represents an individual plant taxon which is encountered by the enumerators. Typically, one voucher specimen is taken for each distinct encountered plant taxon. A field name is allocated by the enumerators, which can be the proper canonical name (if known) or any other moniker. The voucher specimens are later determined by taxonomic experts, who then provide the real, terminal taxonomic name for a given voucher specimen.

This data is kept up to date with the data used in vignettes and package tests. The data is comprised of test records with nonsensical data. The forms used to capture this data are development versions of real-world forms.

32 fq\_submission\_list

fq\_submissions

A nested list of submission data.

# **Description**

Stable

# Usage

fq\_submissions

#### **Format**

A nested list of submission data.

#### **Source**

The output of submission\_get run on the test form 'system.file("extdata", "FloraQuadrat04.xml", package = "ruODK")' using submission instance IDs from submission\_list.

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw, geo\_wkt

fq\_submission\_list

A tibble of submission metadata.

# Description

Stable

# Usage

fq\_submission\_list

#### **Format**

A tibble of submission metadata.

#### Source

The output of submission\_list run on the test form 'system.file("extdata", "FloraQuadrat04.xml", package = "ruODK")'.

 $fq\_svc$  33

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw, geo\_wkt

fq\_svc

OData service document for an ODK Central form.

# Description

Stable

#### Usage

fq\_svc

#### **Format**

A tibble with one row per submission data endpoint.

# **Details**

The OData response for the metadata of an ODK Central form.

This data is kept up to date with the data used in vignettes and package tests. The data is comprised of test records with nonsensical data. The forms used to capture this data are development versions of real-world forms.

#### Source

OData service document for 'system.file("extdata", "FloraQuadrat04.xml", package = "ruODK")'

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw, geo\_wkt

34 fq\_zip\_strata

fq\_zip\_data

A tibble of the main data table of records from a test form.

# **Description**

Stable

# Usage

fq\_zip\_data

#### **Format**

A tibble of main records from a test form.

#### **Source**

submission\_export run on the test form 'system.file("extdata", "FloraQuadrat04.xml", package =
"ruODK")'.

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw, geo\_wkt

fq\_zip\_strata

A tibble of a repeated sub-group of records from a test form.

# Description

Stable

# Usage

fq\_zip\_strata

#### **Format**

A tibble of repeated sub-group of records from a test form.

# Source

submission\_export run on the test form 'system.file("extdata", "FloraQuadrat04.xml", package =
"ruODK")'.

fq\_zip\_taxa 35

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw, geo\_wkt

fq\_zip\_taxa

A tibble of a repeated sub-group of records from a test form.

#### **Description**

Stable

# Usage

fq\_zip\_taxa

#### **Format**

A tibble of repeated sub-group of records from a test form.

#### Source

submission\_export run on the test form 'system.file("extdata", "FloraQuadrat04.xml", package =
"ruODK")'.

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw, geo\_wkt

fs\_v7

The parsed XML form\_schema of a form from ODK Central v0.6.

# **Description**

Stable

# Usage

fs\_v7

#### **Format**

An object of class tbl\_df (inherits from tbl, data.frame) with 12 rows and 3 columns.

#### **Source**

```
form_schema_parse(fs_v7_raw)
```

#### See Also

```
Other included: fq_attachments, fq_data_strata, fq_data_taxa, fq_data, fq_form_detail, fq_form_list, fq_form_schema, fq_form_xml, fq_meta, fq_project_detail, fq_project_list, fq_raw_strata, fq_raw_taxa, fq_raw, fq_submission_list, fq_submissions, fq_svc, fq_zip_data, fq_zip_strata, fq_zip_taxa, fs_v7_raw, geo_fs, geo_gj_raw, geo_gj, geo_wkt_raw, geo_wkt
```

fs\_v7\_raw

The unparsed XML form\_schema of a form from ODK Central v0.6 as nested list.

# Description

#### Stable

# Usage

```
fs_v7_raw
```

#### **Format**

An object of class list of length 6.

#### **Source**

```
form_schema(odkc_version = 0.7,parse = FALSE)
```

```
Other included: fq_attachments, fq_data_strata, fq_data_taxa, fq_data, fq_form_detail, fq_form_list, fq_form_schema, fq_form_xml, fq_meta, fq_project_detail, fq_project_list, fq_raw_strata, fq_raw_taxa, fq_raw, fq_submission_list, fq_submissions, fq_svc, fq_zip_data, fq_zip_strata, fq_zip_taxa, fs_v7, geo_fs, geo_gj_raw, geo_gj, geo_wkt_raw, geo_wkt
```

geo\_fs 37

geo\_fs

The form\_schema of a form containing geofields in GeoJSON.

### **Description**

Stable

## Usage

geo\_fs

#### **Format**

An object of class tbl\_df (inherits from tbl, data.frame) with 19 rows and 4 columns.

## **Source**

form\_schema run on the test form 'system.file("extdata", "Locations.xml", package = "ruODK")'.

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw, geo\_wkt

geo\_gj

The parsed submissions of a form containing geofields in GeoJSON.

## **Description**

Stable

## Usage

geo\_gj

## Format

An object of class tbl\_df (inherits from tbl, data.frame) with 1 rows and 51 columns.

# Source

odata\_submission\_get(wkt=FALSE, parse=TRUE) run on the test form 'system.file("extdata", "Locations.xml", package = "ruODK")'.

38 geo\_wkt

### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_wkt\_raw, geo\_wkt

geo\_gj\_raw

The unparsed submissions of a form containing geofields in GeoJSON.

## **Description**

Stable

### Usage

geo\_gj\_raw

#### **Format**

An object of class list of length 2.

### **Source**

odata\_submission\_get(wkt=FALSE, parse=FALSE) run on the test form 'system.file("extdata",
"Locations.xml", package = "ruODK")'.

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj, geo\_wkt\_raw, geo\_wkt

geo\_wkt

The parsed submissions of a form containing geofields in WKT.

## **Description**

Stable

## Usage

geo\_wkt

geo\_wkt\_raw 39

#### **Format**

An object of class tbl\_df (inherits from tbl, data.frame) with 1 rows and 48 columns.

#### **Source**

odata\_submission\_get(wkt=TRUE, parse=TRUE) run on the test form 'system.file("extdata", "Locations.xml", package = "ruODK")'.

#### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt\_raw

geo\_wkt\_raw

The unparsed submissions of a form containing geofields in WKT.

## Description

## Stable

## Usage

geo\_wkt\_raw

#### **Format**

An object of class list of length 2.

#### Source

odata\_submission\_get(wkt=TRUE, parse=FALSE) run on the test form 'system.file("extdata", "Locations.xml", package = "ruODK")'.

### See Also

Other included: fq\_attachments, fq\_data\_strata, fq\_data\_taxa, fq\_data, fq\_form\_detail, fq\_form\_list, fq\_form\_schema, fq\_form\_xml, fq\_meta, fq\_project\_detail, fq\_project\_list, fq\_raw\_strata, fq\_raw\_taxa, fq\_raw, fq\_submission\_list, fq\_submissions, fq\_svc, fq\_zip\_data, fq\_zip\_strata, fq\_zip\_taxa, fs\_v7\_raw, fs\_v7, geo\_fs, geo\_gj\_raw, geo\_gj, geo\_wkt

40 get\_one\_attachment

get\_one\_attachment Download one media attachment.

# Description

#### Stable

## Usage

```
get_one_attachment(
  pth,
  fn,
  src,
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw(),
  verbose = get_ru_verbose()
)
```

## **Arguments**

| pth     | A local file path to save the attachment to.  |
|---------|---|
| fn      | The attachment filename, as per ODK form submission. If NA, no file will be downloaded, but NA will be returned.  |
| src     | The attachment's download URL, generated by attachment_url.   |
| url     | The ODK Central base URL without trailing slash. Default: <pre>get_default_url</pre> Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK"). |
| un      | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").                  |
| рw      | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").                         |
| verbose | Whether to display debug messages or not. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.             |

## **Details**

This is a helper function used by attachment\_get. This function is not vectorised, but mapped by attachment\_get to a tibble of input parameters.

## Value

The relative local path to the downloaded attachment or NA.

get\_one\_submission 41

### See Also

```
Other utilities: attachment_get(), attachment_url(), form_schema_parse(), get_one_submission_attachment_lisget_one_submission(), handle_ru_attachments(), handle_ru_datetimes(), handle_ru_geopoints(), handle_ru_geoshapes(), handle_ru_geotraces(), isodt_to_local(), odata_submission_rectangle(), predict_ruodk_name(), prepend_uuid(), ru_msg_abort(), ru_msg_info(), ru_msg_noop(), ru_msg_success(), ru_msg_warn(), split_geopoint(), split_geoshape(), split_geotrace(), strip_uuid(), tidyeval, unnest_all()
```

## **Examples**

```
## Not run:
# Step 1: Setup ruODK with OData Service URL (has url, pid, fid)
ruODK::ru_setup(svc = "...")

# Step 2: Construct attachment_url
att_url <- ruODK:::attachment_url(
    "uuid:d3bcefea-32a8-4dbc-80ca-4ecb0678e2b0",
    "filename.jpg"
)

# Step 3: Get one attachment
local_fn <- get_one_attachment("media/filename.jpg", "filename.jpg", att_url)
# In real life: done in bulk behind the scenes during odata_submission_get()
## End(Not run)</pre>
```

get\_one\_submission

Download one submission.

## **Description**

This function is the workhorse for the vectorised function submission\_get, which gets all submissions for a list of submission IDs.

### Usage

```
get_one_submission(
   iid,
   pid = get_default_pid(),
   fid = get_default_fid(),
   url = get_default_url(),
   un = get_default_ur(),
   pw = get_default_pw()
)
```

42 get\_one\_submission

### **Arguments**

| iid | The 'instance_id', a UUID, as returned by submission_list.   |
|-----|--|
| pid | The numeric ID of the project, e.g.: 2. Default: <pre>get_default_pid</pre> . Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").                             |
| fid | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: <pre>get_default_fid</pre> . Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK"). |
| url | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK").                                |
| un  | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").                                       |
| pw  | The ODK Central password. Default: get_default_pw. Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").  |

#### **Details**

Note this function returns a nested list containing any repeating subgroups. As the presence and length of repeating subgroups is non-deterministic and entirely depends on the completeness of the submission data, we cannot rectangle them any further here. Rectangling requires knowledge of the form schema and the completeness of submission data.

#### Stable

## Value

A nested list of submission data.

    un = get_default_url(),
    pw = get_default_pw()
)
```

## **Arguments**

iid

The 'instance\_id', a UUID, as returned by submission\_list.

| pid | The numeric ID of the project, e.g.: 2. Default: <pre>get_default_pid</pre> . Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").                 |
|-----|--|
| fid | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK"). |
| url | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK").                    |
| un  | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").                           |
| рw  | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").                                  |

#### **Details**

When a Submission is created, either over the OpenRosa or the REST interface, its XML data is analysed to determine which file attachments it references: these may be photos or video taken as part of the survey, or an audit/timing log, among other things. Each reference is an expected attachment, and these expectations are recorded permanently alongside the Submission. With this subresource, you can list the expected attachments, see whether the server actually has a copy or not, and download, upload, re-upload, or clear binary data for any particular attachment.

You can retrieve the list of expected Submission attachments at this route, along with a boolean flag indicating whether the server actually has a copy of the expected file or not. If the server has a file, you can then append its filename to the request URL to download only that file.

### Value

A tibble containing some high-level details of the submission attachments. One row per submission attachment, columns are submission attributes:

\* name: The attachment filename, e.g. 12345.jpg \* exists: Whether the attachment for that submission exists on the server.

```

handle\_ru\_attachments 45

### **Examples**

```
## Not run:
# Set default credentials, see vignette "setup"
ruODK::ru_setup(
  svc = paste0(
    "https://sandbox.central.getodk.org/v1/projects/14/",
    "forms/build_Flora-Quadrat-0-2_1558575936.svc"
  ),
  un = "me@email.com",
  pw = "..."
sl <- submission_list()</pre>
al <- get_one_submission_attachment_list(sl$instance_id[[1]])</pre>
al %>% knitr::kable(.)
# attachment_list returns a tibble
class(al)
# > c("tbl_df", "tbl", "data.frame")
# Submission attributes are the tibble's columns
names(al)
# > "name" "exists"
## End(Not run)
```

handle\_ru\_attachments Download and link submission attachments according to a form schema.

# Description

## **Stable**

## Usage

```
handle_ru_attachments(
   data,
   form_schema,
   local_dir = "media",
   pid = get_default_pid(),
   fid = get_default_fid(),
   url = get_default_url(),
   un = get_default_ur(),
   pw = get_default_pw(),
   verbose = get_ru_verbose()
)
```

### **Arguments**

| data        | Submissions rectangled into a tibble. E.g. the output of "'ruODK::odata_submission_get(parse = FALSE) ruODK::odata_submission_rectangle() "'                                     |
|-------------|--|
| form_schema | The 'form_schema' for the submissions. E.g. the output of 'ruODK::form_schema()'.  |
| local_dir   | The local folder to save the downloaded files to, default: "media".  |
| pid         | The numeric ID of the project, e.g.: 2. Default: <pre>get_default_pid</pre> . Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").                 |
| fid         | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK"). |
| url         | The ODK Central base URL without trailing slash. Default: <pre>get_default_url</pre> Set default url through ru_setup(url=""). See vignette("Setup", package = "ruODK").         |
| un          | The ODK Central username (an email address). Default: <pre>get_default_un</pre> . Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").               |
| pw          | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").                                  |
| verbose     | Whether to display debug messages or not. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.                      |

## **Details**

For a given tibble of submissions, download and link attachments for all columns which are marked in the form schema as type "binary".

#### Value

The submissions tibble with all attachments downloaded and linked to a 'local\_dir'.

```

handle\_ru\_datetimes

Parse datetimes of submission data according to a form schema.

#### **Description**

## Stable

## Usage

```
handle_ru_datetimes(
  data,
  form_schema,
  orders = c("YmdHMS", "YmdHMSz", "Ymd HMS", "Ymd HMSz", "Ymd"),
  tz = get_default_tz(),
  verbose = get_ru_verbose()
)
```

## Arguments

verbose

Submissions rectangled into a tibble. E.g. the output of "'ruODK::odata\_submission\_get(parse = FALSE) ruODK::odata\_submission\_rectangle() "'

form\_schema The 'form\_schema' for the submissions. E.g. the output of 'ruODK::form\_schema()'.

orders (vector of character) Orders of datetime elements for lubridate. Default: c("YmdHMS", "YmdHMSz", "YmdHMSz", "Ymd").

tz A timezone to convert dates and times to. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s timezone can be set globally or per function.

Whether to display debug messages or not. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.

48 handle\_ru\_geopoints

### **Details**

For a given tibble of submissions, parse all columns which are marked in the form schema as type "date" or "dateTime" using a set of lubridate orders and a given timezone.

#### Value

The submissions tibble with all date/dateTime columns mutated as lubridate datetimes.

## See Also

handle\_ru\_geopoints Split all geopoints of a submission tibble into their components.

# Description

Stable

#### **Usage**

```
handle_ru_geopoints(data, form_schema, wkt = FALSE, verbose = get_ru_verbose())
```

handle\_ru\_geopoints 49

### **Arguments**

data Submissions rectangled into a tibble. E.g. the output of "ruODK::odata\_submission\_get(parse

= FALSE) ruODK::odata\_submission\_rectangle() ""

 $\label{thm:commutation} for m\_schema ``for the submissions. \ E.g. \ the \ output \ of \ `ruODK::form\_schema()`.$ 

wkt Whether geofields are GeoJSON (if FALSE) or WKT strings (if TRUE), default:

FALSE.

verbose Whether to display debug messages or not. Read 'vignette("setup", package =

"ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.

### **Details**

For a given tibble of submissions, find all columns which are listed in the form schema as type geopoint, and extract their components. Extracted components are longitude (X), latitude (Y), altitude (Z, where given), and accuracy (M, where given).

The original column is retained to allow parsing into other spatially enabled formats.

### Value

The submissions tibble with all geopoints retained in their original format, plus columns of their coordinate components as provided by split\_geopoint.

### See Also

odata\_metadata\_get

Retrieve metadata from an OData URL ending in .svc as list of lists.

# Description

#### Stable

# Usage

```
odata_metadata_get(
  pid = get_default_pid(),
  fid = get_default_fid(),
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw()
)
```

## **Arguments**

| pid | The numeric ID of the project, e.g.: 2. Default: get_default_pid. Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").                             |
|-----|--|
| fid | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK"). |
| url | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup", package = "ruODK").                   |
| un  | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").                           |
| pw  | The ODK Central password. Default: get_default_pw. Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").  |

## Value

A nested list containing Edmx (dataset schema definition) and .attrs (Version).

54 odata\_service\_get

    pw = "..."
)
svc <- odata_service_get()
svc
## End(Not run)</pre>
```

odata\_submission\_get Retrieve and rectangle form submissions, parse dates, geopoints, download and link attachments.

## **Description**

## Stable

## Usage

```
odata_submission_get(
  table = "Submissions",
  skip = NULL,
  top = NULL,
  count = FALSE,
 wkt = FALSE,
  parse = TRUE,
  download = TRUE,
  orders = c("YmdHMS", "YmdHMSz", "Ymd HMS", "Ymd HMSz", "Ymd", "ymd"),
  local_dir = "media",
  pid = get_default_pid(),
  fid = get_default_fid(),
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw(),
  odkc_version = get_default_odkc_version(),
  tz = get_default_tz(),
  verbose = get_ru_verbose()
)
```

### **Arguments**

| table    | The submission EntityType, or in plain words, the table name. Default: Submissions (the main table). Change to Submissions. GROUP_NAME for repeating form groups. The group name can be found through odata_service_get.   |
|----------|--|
| skip     | The number of rows to be omitted from the results. Example: 10, default: NA (none skipped).  |
| top      | The number of rows to return. Example: 100, default: NA (all returned).  |
| count    | If TRUE, an @odata.count property will be returned in the response from ODK Central. Default: FALSE.   |
| wkt      | If TRUE, geospatial data will be returned as WKT (Well Known Text) strings. Default: FALSE, returns GeoJSON structures. Note that accuracy is only returned through GeoJSON.   |
| parse    | Whether to parse submission data based on form schema. Dates and datetimes will be parsed into local time. Attachments will be downloaded, and the field updated to the local file path. Point locations will be split into components; GeoJSON (wkt=FALSE) will be split into latitude, longitude, altitude and accuracy (with anonymous field names), while WKT will be split into longitude, latitude, and altitude (missing accuracy) prefixed by the original field name. See details for the handling of geotraces and geoshapes. Default: TRUE. |
| download | Whether to download attachments to local_dir or not. If in the future ODK Central supports hot-linking attachments, this parameter will replace attachment   |

file names with their fully qualified attachment URL. Default: TRUE.

orders

(vector of character) Orders of datetime elements for lubridate. Default: c("YmdHMS", "YmdHMSz", "Ymd

HMS", "Ymd HMSz", "Ymd", "ymd").

odata\_submission\_get 57

| local_dir    | The local folder to save the downloaded files to, default: "media".  |
|--------------|--|
| pid          | The numeric ID of the project, e.g.: 2. Default: get_default_pid. Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").   |
| fid          | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK").   |
| url          | The ODK Central base URL without trailing slash. Default: <pre>get_default_url</pre> Set default url through ru_setup(url=""). See vignette("Setup", package = "ruODK").   |
| un           | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").   |
| pw           | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").  |
| odkc_version | The ODK Central version as decimal number (major.minor). 'ruODK' uses this parameter to adjust for breaking changes in ODK Central. Default: $get_default_odkc_version$ or 0.8 if unset. Set default $get_default_odkc_version$ through $ru_setup(odkc_version=0.8)$ . See vignette("Setup", package = "ruODK"). |
| tz           | A timezone to convert dates and times to. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s timezone can be set globally or per function.   |
| verbose      | Whether to display debug messages or not. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.  |
|              |  |

### **Details**

odata\_submission\_get downloads submissions from (default) the main form group (submission table) including any non-repeating form groups, or from any other table as specified by parameter 'table'.

With parameter parse=TRUE (default), submission data is parsed into a tibble. Any fields of type dateTime or date are parsed into dates, with an optional parameter tz to specify the local timezone.

A parameter local\_dir (default: media) specifies a local directory for downloaded attachment files. Already existing, previously downloaded attachments will be retained.

With parameter 'wkt=TRUE', spatial fields will be returned as WKT, rather than GeoJSON. In addition, fields of type 'geopoint' will be split into latitude, longitude, and altitude, prefixed with the original field name. E.g. a field 'start\_location' of type 'geopoint' will be split into 'start\_location\_latitude', 'start\_location\_longitude', and 'start\_location\_altitude'. The field name prefix will allow multiple fields of type 'geopoint' to be split into their components without naming conflicts.

Geotraces (lines) and gepshapes (polygons) will be retained in their original format, plus columns of their first point's coordinate components as provided by split\_geotrace and split\_geoshape, respectively.

The only remaining manual step is to optionally join any sub-tables to the master table.

The parameter verbose enables diagnostic messages along the download and parsing process.

odata\_submission\_get

With parameter parse=FALSE, submission data is presented as nested list, which is the R equivalent of the JSON structure returned from the API. From there, odata\_submission\_rectangle can rectangle the data into a tibble, and subsequent lines of handle\_ru\_datetimes, handle\_ru\_attachments, handle\_ru\_geopoints, handle\_ru\_geotraces, and handle\_ru\_geoshapes parse dates, download and link file attachments, and extract coordinates from geofields. ruODK offers this manual and explicit pathway as an option to investigate and narrow down unexpected or unwanted behaviour.

#### Value

A list of lists.

- value contains the submissions as list of lists.
- @odata.context is the URL of the metadata.
- @odata.count is the total number of rows in the table.

```
## Not run:
# Set default credentials, see vignette "setup"
ruODK::ru_setup(
 svc = paste0(
    "https://sandbox.central.getodk.org/v1/projects/14/",
    "forms/build_Flora-Quadrat-0-2_1558575936.svc"
 un = "me@email.com",
 pw = "..."
)
form_tables <- ruODK::odata_service_get()</pre>
data <- odata_submission_get() # default: main data table</pre>
data <- odata_submission_get(table = form_tables$url[1]) # same, explicitly</pre>
data_sub1 <- odata_submission_get(table = form_tables$url[2]) # sub-table 1</pre>
data_sub2 <- odata_submission_get(table = form_tables$url[3]) # sub-table 2</pre>
# Skip one row, return the next 1 rows (top), include total row count
data <- odata_submission_get(</pre>
 table = form_tables$url[1],
 skip = 1,
 top = 1,
 count = TRUE
## End(Not run)
```

```
odata_submission_rectangle
```

Rectangle the output of odata\_submission\_get(parse=FALSE) into a tidy tibble and unnest all levels.

## **Description**

#### Stable

## Usage

```
odata_submission_rectangle(
  data,
  names_repair = "universal",
  names_sep = "_",
  form_schema = NULL,
  verbose = get_ru_verbose()
)
```

### **Arguments**

| data         | A nested list of lists as given by odata_submission_get.   |
|--------------|--|
| names_repair | The argument names_repair for tidyr::unnest_wider, default: "universal".   |
| names_sep    | The argument names_sep for tidyr::unnest_wider, default: "_". Un-nested variables inside a list column will be prefixed by the list column name, separated by names_sep. This avoids unsightly repaired names such as latitude1.                                   |
| form_schema  | An optional form_schema, like the output of form_schema. If a form schema is supplied, location fields will not be unnested. While WKT location fields contain plain text and will never be unnested, GeoJSON location fields would cause errors during unnesting. |
| verbose      | Whether to display debug messages or not. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.  |

#### Value

The submissions as un-nested tibble

### **Examples**

```
## Not run:
# Using canned data
data_parsed <- odata_submission_rectangle(fq_raw, verbose = TRUE)
# Field "device_id" is known part of fq_raw
testthat::expect_equal(
    data_parsed$device_id[[1]],
    fq_raw$value[[1]]$device_id
)

# fq_raw has two submissions
testthat::expect_equal(length(fq_raw$value), nrow(data_parsed))
## End(Not run)</pre>
```

odata\_svc\_parse

Retrieve URL, project ID, and form ID from an ODK Central OData service URL

## **Description**

### Stable

## Usage

```
odata_svc_parse(svc)
```

## Arguments

svc

(character) The OData service URL of a form as provided by the ODK Central form submissions tab. Example: "https://sandbox.central.getodk.org/v1/projects/14/forms/build\_Flora-Quadrat-0-2\_1558575936.svc"

### Value

A named list with three components (all of type character):

- url The ODK Central base URL.
- pid The project ID.
- fid The form ID.

project\_create 61

project\_create

Create a new project.

## **Description**

### **Experimental**

### Usage

```
project_create(
  name,
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw()
)
```

### **Arguments**

| name | The desired name of the project. Can contain whitespace.  |
|------|---|
| url  | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK"). |
| un   | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").        |
| рw   | The ODK Central password. Default: get_default_pw. Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").                           |

## Value

A tibble with one row per project and all project metadata as columns as per ODK Central API docs.

#### See Also

```
https://odkcentral.docs.apiary.io/#reference/project-management/projects/creating-a-project
Other restful-api: attachment_link(), attachment_list(), audit_get(), form_detail(), form_list(),
form_schema(), form_xml(), project_detail(), project_list(), submission_detail(), submission_export(),
submission_get(), submission_list()
```

```
## Not run:
# Set default credentials, see vignette "setup"
ruODK::ru_setup(
   svc = paste0(
        "https://sandbox.central.getodk.org/v1/projects/14/",
```

62 project\_detail

```
"forms/build_Flora-Quadrat-0-2_1558575936.svc"
),
  un = "me@email.com",
  pw = "..."
)

p <- project_create("Test Project")
knitr::kable(p)

# project_create returns a tibble
class(p)
# > "tbl_df" "tbl" "data.frame"

# columns are project metadata
names(p)
# > "id" "name" "archived"

## End(Not run)
```

project\_detail

List all details of one project.

## **Description**

While the API endpoint will return all details for one project, project\_detail will fail with incorrect or missing authentication.

# Usage

```
project_detail(
  pid = get_default_pid(),
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw()
)
```

## Arguments

| pid | The numeric ID of the project, e.g.: 2. Default: get_default_pid. Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").          |
|-----|---|
| url | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK"). |
| un  | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").        |
| pw  | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup", package = "ruODK").              |

project\_list 63

### **Details**

Stable

### Value

A tibble with exactly one row for the project and all project metadata as columns as per ODK Central API docs. Column names are renamed from ODK's 'camelCase' to 'snake\_case'. Values differ to values returned by ODK Central API:

\* archived: FALSE (if NULL) else TRUE \* dates: NA if NULL

#### See Also

),
    un = "me@email.com",
    pw = "..."
)

pd <- project_detail()

pd %>%
    dplyr::select(-"verbs") %>%
    knitr::kable(.)

## End(Not run)
```

project\_list

List all projects.

## Description

While the API endpoint will return all projects, project\_list will fail with incorrect or missing authentication.

project\_list

### Usage

```
project_list(
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw()
)
```

# Arguments

| url | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK"). |
|-----|---|
| un  | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").        |
| pw  | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup", package = "ruODK").              |

#### **Details**

**Stable** 

#### Value

A tibble with one row per project and all project metadata as columns as per ODK Central API docs.

```
Other utilities: attachment_get(), attachment_url(), form_schema_parse(), get_one_attachment(), get_one_submission_attachment_list(), get_one_submission(), handle_ru_attachments(), handle_ru_datetimes(), handle_ru_geopoints(), handle_ru_geoshapes(), handle_ru_geotraces(), isodt_to_local(), odata_submission_rectangle(), predict_ruodk_name(), prepend_uuid(), ru_msg_abort(), ru_msg_info(), ru_msg_noop(), ru_msg_warn(), split_geopoint(), split_geoshape(), split_geotrace(), strip_uuid(), tidyeval, unnest_all()
```

```
ru_msg_success("This is a success message.")
```

ru\_settings

ru\_msg\_warn

rlang::warn() with a yellow warning message with a warning symbol.

## **Description**

Stable

## Usage

```
ru_msg_warn(message)
```

## **Arguments**

message

<chr> A message to print

### See Also

```
Other utilities: attachment_get(), attachment_url(), form_schema_parse(), get_one_attachment(), get_one_submission_attachment_list(), get_one_submission(), handle_ru_attachments(), handle_ru_datetimes(), handle_ru_geopoints(), handle_ru_geoshapes(), handle_ru_geotraces(), isodt_to_local(), odata_submission_rectangle(), predict_ruodk_name(), prepend_uuid(), ru_msg_abort(), ru_msg_info(), ru_msg_noop(), ru_msg_success(), split_geopoint(), split_geoshape(), split_geotrace(), strip_uuid(), tidyeval, unnest_all()
```

# **Examples**

```
## Not run:
ru_msg_warn("This is a warning.")
## End(Not run)
```

ru\_settings

Get or set ruODK settings.

## **Description**

Stable

# Usage

```
ru_settings()
get_default_pid()
get_default_fid()
```

ru\_settings 69

```
get_default_url()
get_default_un()
get_default_pw()
get_default_tz()
get_test_url()
get_test_un()
get_test_pw()
get_test_pid()
get_test_fid()
get_test_fid_zip()
get_test_fid_att()
get_test_fid_gap()
get_test_fid_wkt()
get_ru_verbose()
get_default_odkc_version()
get_test_odkc_version()
```

### Value

ru\_settings prints your default ODK Central project ID, form ID, url, username, and password, corresponding optional test server as well as verbosity settings. ru\_setup sets your production and test settings, while get\_(default/test)\_\* get each of those respective settings.

#### See Also

```
ru_setup, get_default_pid, get_default_fid, get_default_url, get_default_un, get_default_pw,
get_default_tz, get_default_odkc_version, get_test_pid, get_test_fid, get_test_fid_zip,
get_test_fid_att, get_test_fid_gap, get_test_fid_wkt, get_test_url, get_test_un, get_test_pw,
get_test_odkc_version, get_ru_verbose.
Other ru_settings: odata_svc_parse(), ru_setup(), yell_if_error(), yell_if_missing()
```

```
ru_settings()
```

70 ru\_setup

ru\_setup

Configure default ruODK settings.

# Description

Settings are returned invisibly and additionally printed depending on get\_ru\_verbose.

# Usage

```
ru_setup(
  svc = NULL,
 pid = NULL,
 fid = NULL,
 url = NULL,
 un = NULL,
 pw = NULL,
  tz = NULL,
 odkc_version = NULL,
  test_svc = NULL,
  test_pid = NULL,
  test_fid = NULL,
  test_fid_zip = NULL,
  test_fid_att = NULL,
  test_fid_gap = NULL,
  test_fid_wkt = NULL,
  test_url = NULL,
  test_un = NULL,
  test_pw = NULL,
 test_odkc_version = NULL,
  verbose = NULL
)
```

# Arguments

| SVC | (optional, character) The OData service URL of a form. This parameter will set pid, fid, and url. It is sufficient to supply svc, un, and pw.                   |
|-----|---|
| pid | (optional, character) The ID of an existing project on url. This will override the project ID from svc. A numeric value for pid will be converted to character. |
| fid | (optional, character) The alphanumeric ID of an existing form in pid. This will override the form ID from ${\tt svc}$ .   |
| url | An ODK Central URL, e.g. "https://sandbox.central.getodk.org". This will override the ODK Central base URL from svc.  |
| un  | An ODK Central username which is the email of a "web user" in the specified ODK Central instance url (optional, character).                                     |
| pw  | The password for user un (optional, character).   |
|     |   |

ru\_setup 71

tz Global default time zone. 'ruODK''s time zone is determined in order of precedence:

- Function parameter: e.g. odata\_submission\_get(tz = "Australia/Perth")
- 'ruODK' setting: ru\_setup(tz = "Australia/Perth")
- Environment variable 'RU\_TIMEZONE' (e.g. set in '.Renviron')
- UTC (GMT+00)

test\_svc

test\_fid\_wkt

test\_url

test\_un

verbose

odkc\_version The ODK Central version as major/minor version, e.g. 0.8.

(optional, character) The OData service URL of a test form. This parameter will set test\_pid, test\_fid, and test\_url. It is sufficient to supply test\_svc, test\_un, and test\_pw to configure testing.

test\_pid (optional, character) The numeric ID of an existing project on test\_url. This will override the project ID from test\_svc. A numeric value for test\_pid will be converted to character.

test\_fid (optional, character) The alphanumeric ID of an existing form in test\_pid. This will override the form ID from test\_svc. This form is used as default form in all tests, examples, vignettes, data, and Rmd templates.

test\_fid\_zip (optional, character) The alphanumeric ID of an existing form in test\_pid. This will override the form ID from test\_svc. Provide the form ID of a form with few submissions and without attachments. This form is used to test the repeated download of all form submissions.

test\_fid\_att (optional, character) The alphanumeric ID of an existing form in test\_pid. This will override the form ID from test\_svc. Provide the form ID of a form with few submissions and few attachments. This form is used to test downloading and linking attachments.

test\_fid\_gap (optional, character) The alphanumeric ID of an existing form in test\_pid. This will override the form ID from test\_svc. Provide the form ID of a form with gaps in the first submission. This form is used to test parsing incomplete submissions.

(optional, character) The alphanumeric ID of an existing form in test\_pid. This will override the form ID from test\_svc. Provide the form ID of a form with geopoints, geotraces, and geoshapes.

(optional, character) A valid ODK Central URL for testing. This will override the ODK Central base URL from svc.

(optional, character) A valid ODK Central username (email) privileged to view the test project(s) at test\_url.

test\_pw (optional, character) The valid ODK Central password for test\_un. test\_odkc\_version

The ODK Central test server's version as major/minor version, e.g. 0.8.

Global default for 'ruODK' verbosity. 'ruODK' verbosity is determined in order of precedence:

- Function parameter: e.g. odata\_submission\_get(verbose = TRUE)
- 'ruODK' setting: ru\_setup(verbose = TRUE)
- Environment variable 'RU\_VERBOSE' (e.g. set in '.Renviron')
- 'FALSE'.

72 split\_geopoint

#### **Details**

#### Stable

ru\_setup sets ODK Central connection details. ruODK's functions default to use the default project ID, form ID, URL, username, and password unless specified explicitly.

Any parameters not specified will remain unchanged. It is therefore possible to set up username and password initially with ru\_setup(un="XXX", pw="XXX"), and switch between forms with ru\_setup(svc="XXX"), supplying the form's OData service URL. ODK Central conveniently provides the OData service URL in the form submission tab, which in turn contains base URL, project ID, and form ID.

ruODK's automated tests require a valid ODK Central URL, and a privileged username and password of a "web user" on that ODK Central instance, as well as an existing project and form.

#### See Also

```

 test_fid_gap = "build_Turtle-Track-or-Nest-1-0_1569907666",
 test_fid_wkt = "build_Locations_1589344221",
  verbose = TRUE
)
```

split\_geopoint

Annotate a dataframe containing a geopoint column with lon, lat, alt.

#### **Description**

Stable

## Usage

```
split_geopoint(data, colname, wkt = FALSE)
```

split\_geopoint 73

## **Arguments**

data (dataframe) A dataframe with a geopoint column.

colname (chr) The name of the geopoint column. This column will be retained.

wkt Whether geofields are GeoJSON (if FALSE) or WKT strings (if TRUE), default: FALSE.

#### **Details**

This function is used by handle\_ru\_geopoints on all geopoint fields as per form\_schema.

## Value

The given dataframe with the WKT POINT column <colname>, plus three new columns, <colname>\_longitude, <colname>\_latitude, <colname>\_altitude. The three new columns are prefixed with the original colname to avoid naming conflicts with any other geopoint columns.

#### See Also

split_geoshape
                          Annotate a dataframe containing a geoshape column with lon, lat, alt
                          of the geotrace's first point.
```

## Description

#### **Stable**

# Usage

```
split_geoshape(data, colname, wkt = FALSE, odkc_version = odkc_version)
```

## **Arguments**

data (dataframe) A dataframe with a geoshape column.

colname (chr) The name of the geoshape column. This column will be retained.

wkt Whether geofields are GeoJSON (if FALSE) or WKT strings (if TRUE), default:

FALSE.

odkc\_version The ODK Central version as decimal number (major.minor). 'ruODK' uses this

parameter to adjust for breaking changes in ODK Central. Default: get\_default\_odkc\_version or 0.8 if unset. Set default get\_default\_odkc\_version through ru\_setup(odkc\_version=0.8).

See vignette("Setup", package = "ruODK").

## **Details**

This function is used by handle\_ru\_geopoints on all geopoint fields as per form\_schema.

## Value

The given dataframe with the geoshape column <colname>, plus three new columns, <colname>\_longitude, <colname>\_latitude, <colname>\_altitude. The three new columns are prefixed with the original colname to avoid naming conflicts with any other geoshape columns.

```

## **Arguments**

data (dataframe) A dataframe with a geotrace column.

colname (chr) The name of the geotrace column. This column will be retained.

wkt Whether geofields are GeoJSON (if FALSE) or WKT strings (if TRUE), default:

FALSE.

odkc\_version The ODK Central version as decimal number (major.minor). 'ruODK' uses this

parameter to adjust for breaking changes in ODK Central. Default: get\_default\_odkc\_version or 0.8 if unset. Set default get\_default\_odkc\_version through ru\_setup(odkc\_version=0.8).

See vignette("Setup", package = "ruODK").

## **Details**

This function is used by handle\_ru\_geopoints on all geopoint fields as per form\_schema.

The format of the geotrace (GeoJSON, WKT, ODK Linestring) is determined via parameters 'wkt' and 'odkc\_version', rather than inferred from the class of the column. ODK Linestrings are character vectors without a leading "LINESTRING (", WKT are character vectors with a leading "LINESTRING (", and GeoJSON are list columns.

split\_geotrace 77

#### Value

The given dataframe with the geotrace column <colname>, plus three new columns, <colname>\_longitude, <colname>\_latitude, <colname>\_altitude. The three new columns are prefixed with the original colname to avoid naming conflicts with any other geotrace columns.

## End(Not run)
```

submission\_detail

Show metadata for one submission.

# **Description**

#### Stable

## Usage

```
submission_detail(
    iid,
    pid = get_default_pid(),
    fid = get_default_fid(),
    url = get_default_url(),
    un = get_default_urn(),
    pw = get_default_pw()
)
```

## **Arguments**

```
iid The 'instance_id', a UUID, as returned by submission_list.
pid The numeric ID of the project, e.g.: 2. Default: get_default_pid. Set default pid through ru_setup(pid="..."). See vignette("Setup",package = "ruODK").
```

submission\_detail 79

| fid | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". De-   |
|-----|---|
|     | <pre>fault: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK").</pre>   |
| url | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK"). |
| un  | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").        |
| pw  | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup", package = "ruODK").              |

## Value

A nested list of submission metadata.

## End(Not run)
```

80 submission\_export

submission\_export

Export all form submissions including repeats and attachments to CSV.

# Description

To export all the Submission data associated with a Form, just add .csv.zip to the end of the listing URL. The response will be a zip file containing one or more CSV files, as well as all multimedia attachments associated with the included Submissions.

# Usage

```
submission_export(
  local_dir = here::here(),
  overwrite = TRUE,
  pid = get_default_pid(),
  fid = get_default_fid(),
  url = get_default_url(),
  un = get_default_url(),
  pw = get_default_pw(),
  verbose = get_ru_verbose()
)
```

## **Arguments**

| local_dir | The local folder to save the downloaded files to, default: here::here.   |
|-----------|--|
| overwrite | Whether to overwrite previously downloaded zip files, default: FALSE   |
| pid       | The numeric ID of the project, e.g.: 2. Default: <pre>get_default_pid</pre> . Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").                 |
| fid       | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK"). |
| url       | The ODK Central base URL without trailing slash. Default: get_default_url. Set default url through ru_setup(url=""). See vignette("Setup",package = "ruODK").                    |
| un        | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").                           |
| pw        | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").                                  |
| verbose   | Whether to display debug messages or not. Read 'vignette("setup", package = "ruODK")' to learn how 'ruODK''s verbosity can be set globally or per function.                      |

submission\_export 81

#### **Details**

The file will be downloaded to the project root unless specified otherwise (via 'local\_dir'). Subsequently, the zip file can be extracted. Attachment filenames (e.g. "12345.jpg") should be prepended with 'media' (resulting in e.g. 'media/12345.jpg') in order to represent the relative path to the actual attachment file (as extracted from the zip file).

This function downloads all submissions and attachments in one go. For incremental download of a subset of submissions, use submission\_list, choose the submissions of interest (e.g. by submission date), and use their unids to download them one by one via submission\_get. Download attachments as listed for each submission (attachment\_list).

#### Stable

#### Value

The absolute path to the zip file named "'fid'.zip" containing submissions as CSV, plus separate CSVs for any repeating groups, plus any attachments in a subfolder 'media'.

sub <- fs::path(t, glue::glue("{fid}.csv")) %>% readr::read_csv()
sub %>% knitr::kable(.)
## End(Not run)
```

82 submission\_get

submission\_get Get submissions for a list of submission instance IDs.

# Description

Uses get\_one\_submission on a list of submission instance IDs ('iid') as returned from submission\_list\$instance\_id. By giving the list of 'iid' to download explicitly, that list can be modified using information not accessible to 'ruODK', e.g. 'iid' can be restricted to "only not already downloaded submissions".

# Usage

```
submission_get(
   iid,
   pid = ruODK::get_test_pid(),
   fid = ruODK::get_test_fid(),
   url = ruODK::get_test_url(),
   un = ruODK::get_test_url(),
   pw = ruODK::get_test_pw()
)
```

# **Arguments**

| iid | A list of submission instance IDs, e.g. from submission_list\$instance_id.   |
|-----|--|
| pid | The numeric ID of the project, e.g.: 2. Default: get_default_pid. Set default pid through ru_setup(pid=""). See vignette("Setup",package = "ruODK").                             |
| fid | The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid=""). See vignette("Setup",package = "ruODK"). |
| url | The ODK Central base URL without trailing slash. Default: <pre>get_default_url</pre> Set default url through ru_setup(url=""). See vignette("Setup", package = "ruODK").         |
| un  | The ODK Central username (an email address). Default: get_default_un. Set default un through ru_setup(un=""). See vignette("Setup",package = "ruODK").                           |
| рw  | The ODK Central password. Default: <pre>get_default_pw</pre> . Set default pw through ru_setup(pw=""). See vignette("Setup",package = "ruODK").                                  |

# Value

A nested list of submission data.

submission\_list 83

## See Also

```
Other restful-api: attachment_link(), attachment_list(), audit_get(), form_detail(), form_list(), form_schema(), form_xml(), project_create(), project_detail(), project_list(), submission_detail(), submission_export(), submission_list()
```

# **Examples**

```
## Not run:
# Step 1: Setup ruODK with OData Service URL (has url, pid, fid)
ruODK::ru_setup(svc = "...")

# Step 2: List all submissions of form
sl <- submission_list()

# Step 3: Get submissions
subs <- submission_get(sl$instance_id)

## End(Not run)</pre>
```

submission\_list

List all submissions of one form.

## **Description**

#### Stable

## Usage

```
submission_list(
  pid = get_default_pid(),
  fid = get_default_fid(),
  url = get_default_url(),
  un = get_default_un(),
  pw = get_default_pw()
)
```

## **Arguments**

```
The numeric ID of the project, e.g.: 2. Default: get_default_pid. Set default pid through ru_setup(pid="..."). See vignette("Setup",package = "ruODK").

The alphanumeric form ID, e.g. "build_Spotlighting-0-8_1559885147". Default: get_default_fid. Set default fid through ru_setup(fid="..."). See vignette("Setup",package = "ruODK").
```

84 submission\_list

#### Value

A tibble containing some high-level details of the form submissions. One row per submission, columns are submission attributes:

\* instance\_id: uuid, string. The unique ID for each submission. \* submitter\_id: user ID, integer. \* created\_at: time of submission upload, dttm \* updated\_at: time of submission update on server, dttm or NA
